

AMOSORB

(The natural solution to control ammonia.)

**Controls ammonia in the water column of the aquaculture Pond
Inhibits enzyme urease and curbs ammonia formation.**

500gm

Dosage : 500gm/ Acre

SOFTER

(Water softener and chelating substance.)

**Advanced formulation to reduce toxin compounds.
Stabilizes alkalinity and balances pH fluctuations.**

1 Kg

Dosage : 1Kg/ Acre water application

SIZER

(Potassium monopersulphate powder.)

Sizer is a broad spectrum disinfectant which adds an impermeable layer to your aquaculture system's biosecurity.

Helps to reduce toxic Bacteria in aquaculture system and reduce parasitic infection.

1 Kg

Dosage : 1Kg/ Acre water application

BIOCLEAN 80

(Special water treatment and conditioner for aquaculture.)

Eliminates tail and fin rot, fungal disease, dropsy and any others bacterial, viral and algal derived diseases.

Removes black gill disease, soft shell disease, yellow head disease, and malnutrition disease. Excellent both in saline and fresh water.

1 lit, 5 lit & 20 lit Dosage : 1Kg/ Acre

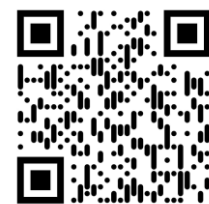

YODINE

(Sanitizer lethal to bacteria virus fungi and protozoa.)

**Unique formulation of Iodophore -20%
Controls bacterial, fungal and protozoa infection protects from Secondary infection.**

1 lit

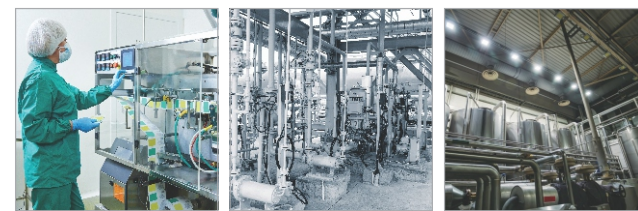

Dosage : 1Kg/ Acre

About us

Sagar Biocare Pvt. Ltd. is firmly committed to address the emerging local and global challenges to provide farmers with custom products with custom solutions, improving products and processes by development and evolution.

Sagar Biocare Pvt. Ltd. invests the sum of its knowledge, resources and experiences in aquaculture production to keep livestock healthy and safe.

Sagar Biocare Pvt. Ltd. researches, develops, manufactures and markets a specialized product package for both Animal Health and Aquaculture; in particular Drug Formulations, Feed Supplements, Premixes, Biotechnology Formulations, Toxin Binders and Toxin Control Products and wide range of Biosecurity Formulations.

The key competitive strengths of Sagar are its highest standards for scientific research excellence, business ethics, work ethic and customer service with an aid of an experienced management team, which has a record of accomplishment in the animal health industry.

We as a process for continuous development undertake field trials of new and existing products to validate and support future development, which is increasingly, research driven.

Corporate Close-up

From the year 2001, the journey of Sagar Aquaculture Pvt. Ltd. started with the manufacturing of Fishing Floats and Long Arm Impeller, to overcome the hurdle of parts unavailability and service issues of imported Paddle Wheel Aerator, we decided to start manufacturing complete Aerator in India. Sagar Aquaculture Pvt. Ltd. provided innovative products to aquaculture industries, by 2022 Sagar Aquaculture Pvt. Ltd., become India's No. 1 Aerator Manufacturing Company with network in 25+ country world-wide.

In our quest to expand our reach in aquaculture Industries in year 2015 we decided to start prawns culture to gain new insight about aquaculture. Since 2015 our qualified team is continuously analysing problems faced by aqua farmers. To overcome limitations of the solutions provided by aquaculture equipments we started working on biological solutions in 2019.

To satisfy the needs of new era aqua farmers in 2022, Sagar Biocare Pvt. Ltd.. A new venture has formed to fulfil our mission to be the premier provider of exclusive and innovative technologies that will help to improve animal care worldwide by providing solutions for aquaculture and veterinary professionals, animal producers and pet owners. Our customer centric approach from last two decades has helped us constantly innovate; design products and solutions in a quality-driven and technology-led environment and distributed through a national and international network of partners.

We Provide Improved Sustainable Aquaculture

Manufactured & Marketed By

Sagar Biocare Pvt. Ltd.

Survey No. 122, Veraval, Rajkot (Gujarat) INDIA.

The **Sagar**®
—good care of growth—

An ISO 9001:2015 and IAF Certified Company

NUTRO gel

(A unique binder with all essential qualities and attractants.)

Nutro Gel has an excellent binding capacity with multiple vitamins and minerals with maximum absorbing agents. It attracts shrimps towards feed with its finest reeking substances.

1 Kg, 5 kg & 20 kg
Dosage : 10-15ml/ Kg Feed

QUICK

(Unique formulation for quick binder gel.)
unique biner gel making formula farmer can make binder from Quick Powder on feild. Cost effective / easy preparation.

300 gm
Dosage : 10-15gm of Prepared gel/ Kg Feed

BLUE CEE

(Concentrated and stable vitamin C along with MOS & electrolyte.)

Controls post moulting mortality and rulling mortality. VITAMIN-C in most stable, insoluble and highly bio available form helps reduce stress.

500 gm
Dosage : 5-10gm/ Kg Feed

MIN FLOW

(A novel moult inducer with multivitamins & minerals)

Min Flow helps to condense muscle build up and enhance good quality texture of shrimp muscle. Min Flow provides muscle strength to the shrimp by soluble calcium sources.

500 gm
Dosage : 3-5gm/ Kg Feed

PRO YEAST

(Dry yeast for aquaculture.)

Improved feed conversion. Improved pond conditions with good plankton and beneficial bacterial density.

500gm
Dosage : 10gm/ Kg feed
1Kg/ Acre water application

RAIGO

(Aquaculture growth promoter.)

Raigo helps to breakdown the fats, proteins and carbohydrates and to use those nutrients for growth and for shell repair. GROWTH PROMOTER FOR AQUACULTURE SYSTEM.

1 kg
Dosage : 3-5gm/ Kg feed

HEALTHYGUT

(Controls white gut & white feces gradually.)

Prevent/treat white gut and white feces. Improves feed intake, FCR, and overall performance.

500 ml/ 1 lit
Dosage : 5ml/ Kg Feed

VIT FLO

(Growth promoter for aquaculture.)

Growth promoter with multivitamin Helps to maintain osmoregulation Efficient feed conversion.

1 Kg
Dosage : 10gm/ Kg feed

CLAROXY

(Enriched oxygen granules.)

Claroxy immediately increases the required amount of dissolved oxygen in the pond after application. Controls DO problem in aquaculture ponds and reduce risk of mass mortality.

10 kg
Dosage : 5Kg/ Acre

CLAROXY TAB

(Enriched oxygen tablets.)

Helps to supply oxygen up to 10 hours Reduce unanaerobic condition at Pond bottom Reduce nitrite and hydrogen sulphide

1 Kg
Dosage : 1.5 - 2Kg/ Acre

PROWA+

(A synergistic formulation of unique bacterial strains (aquaculture probiotics))

Bioremediation process for aquaculture ponds to reduce BOD & COD. Reduces sludge and maintains Water quality. Maintain bloom and pond pH.

500 gms (Water Soluble Pouches)
Dosage : 250gm/ Acre

LIQPRO - PS

(Concentrated liquid soil probiotic for aquaculture.)

Highly concentrated photosynthetic bacteria culture to protect pond bottom healthy. Reduces bad smell and oxidise bottom sludge/black soil

20 lit
Dosage : 10lit/ Acre

SAGAR min

(Mineral mixture for aquaculture.)

Protects from mineral deficiencies in shrimp/fish. Ensures efficient osmoregulation mechanism.

20 kg
Dosage : 8-10Kg/ Acre

DEOLITE

(Aquaculture zeolite with high CEC capacity.)

Improves water quality by adsorption of suspended solids, organic waste and dissolved toxic gases.

25 kg
Dosage : 10-15Kg/ Acre

DEOLITE Plus

(Zeolite granules enriched with high quality Yucca & enzymes.)

Controls ammonia in the water column of aquaculture pond. Granules helps to reach pond bottom and act properly.

15 kg
Dosage : 10Kg/ Acre

POND SHADE

(Water colorant for aquatic pond.)

POND SHADE assimilates light intensity in transparent pond and reduce light stress on Shrimp and Fish. POND SHADE control Phytoplankton bloom & pH Fluctuation. POND SHADE reduces Algae (including Benthic Algae) Content in ponds.

500 gms
Dosage : 250gm/ Acre
